

We Have a Big Vision

Mercy Ministries International is committed to strengthening and enriching the community of El Rio. There are several cultures living here side-by-side. Our vision is to provide the life essential resources and services to help them flourish.

We are looking ahead to the next generations in this community - to how non-native born Latino and Mixteco residents of El Rio will forge new futures here, in one community, as our neighbors in our great "melting pot".

But how will they be prepared to lead their community tomorrow? How can children disadvantaged by hunger and poverty and deficient in English proficiency gain the life skills necessary to build the foundations for their generations to come?

Our goal is to intervene in three ways: with ample nutrition, special one-on-one tutoring and a transitional home for single mothers and their children. At each point our focus is to enrich the environment in which these children will grow.

Your Contribution is Needed

Your contributions will help us feed, nurture and provide one-on-one educational assistance and computer skills to families. We believe that there are people willing to invest resources and time into the lives of others today to build a better tomorrow.
